WORK EXPERIENCE

Sr. Frontend Developer IT Frog(ShakeShack)

09/2022 - Present

Achievements/Tasks

- Using TypeScript/ReactJs/JavaScript to develop designs from Figma or Adobe XD and Connecting the Front end interface with the backend Microservices.
- Working with ShakeShack's eCommerce project to further extend their line of products. It involves using react-hook-forms, styled-components, lefthook amongst many libraries. The app supports pickup as well as delivery orders.
- Fetching data from APIs, wrangling the response and render them onto variety of front-end designs. Storing the data onto Global State Management tool i.e. Redux or Flux.
- Regular feature development, bugfixes, maintaining existing codebase and approving PRs.
- End to end testing of the entire product using Puppeteer, Jest or Enzyme. Putting test-driven development first and writing custom test functions

Frontend Developer Amdocs

11/2019 - 04/2021

Achievements/Tasks

- Implementing high fidelity designs into interactive webapps. Using HTML5, CSS, SASS on daily basis.
- Built CSR interface for Cellcom(Israel) where the user account information, interactions, services were tracked. This involved making changes to existing plans of the customer.
- Worked in Vodafone(Italy) where the team built the entire Vodafone's web portal where customer can buy plans, phones, edit information, add items to shopping cart etc.
- Developed REST APIs from scratch using Node.Js and Express.Js as primary technologies although at times Spring boot MVC architecture was used.
- Collaboration with product team members to implement new feature developments as per given wireframes.
- Using Nodemailer, StripeJS, Mongoose, jwtoken and other libraries to add mailing, payment and security features in the backend.
- Discussion with team over the analysis, design and development aspects of the project in Scrum meetings.
